

10-Years Making a Difference

The UHVRC is a nonprofit partnership between Merck Animal Health and the American Association of Equine Practitioners (AAEP), established in 2008.

The program provides qualifying equine rescue and retirement facilities with vaccines for horses in their care, to help protect against:

- West Nile Virus
- Eastern/Western encephalomyelitis
- Tetanus
- Rabies
- Influenza
- Herpesvirus

THANK YOU

for choosing Merck Animal Health vaccines—every vaccine purchase goes toward supporting the UHVRC.

Celebrating 10 Years of Commitment

UHVRC

Unwanted Horse Veterinary Relief Campaign

BY THE NUMBERS

"The vaccines that we receive from Merck Animal Health help us ensure the horses we adopt out are up-to-date on shots. It also gives credibility to our rescue that our horses are treated just like the top-quality horses you see at a show barn."

Andrea Mena, Vice President
Drifter's Hearts of Hope
Franktown, CO

"Our herd of horses are the most important animals in our lives. These horses provide so much support, guidance, strength and opportunities for empathy to our students, volunteers, staff and the public. We are deeply grateful that your team recognizes the need for centers, such as ours, to receive financial support to help in their care."

Laura Pallavicini, Executive Director
Riverwood Therapeutic Riding Center
Tobaccoville, NC
